The following list describes the 3,822.04 acres of indemnity salt spring land transferred to the University of Minnesota on April 6, 1885. These were indemnity lands in lieu of some of the original land around Skinner's salt springs 1 and 2 that were claimed by settlers.

Traditionally, the legal description of land parcels goes from smallest to largest increment so a 40-acre parcel of land might be described as the northwest quarter of the southeast quarter of sec 24, T 163 N, R 45W. However, most people who are unfamiliar with that system find it easier to figure out where a land parcel is if they start with the township and range, then move down to the section and then the smaller increments. Hence the following list will use that pattern.

In terms of the smaller designations, for most sections, the full section (all below) is 640 acres. A half section is 320 acres and a quarter section 160 acres. However, the quarter sections are often broken down further into either a half of the quarter section (80 acres) or a quarter of the quarter section (40 acres). Examples are shown below. The lots in the list are where there are parcels of irregular size and shape. The only way to determine the location of such a lot is by referring to that section's survey map.
